Informatics graduate from Telkom University with hands-on experience in web and application development. Experienced in building web applications using React and Laravel, mobile applications using Flutter and Firebase, and Java applications with the MVC architecture. Also familiar with game development using Unity. Eager to continue learning and applying technical skills to real-world projects.

WORK EXPERIENCE

Network Administrator Internship, Yayasan Taruna Bakti **July 2025 - Sept 2025**

- Developed a school website using React and Laravel, implementing frontend interfaces, backend functionality, and API integration.
- Configured web server, domain, HTTPS, and database settings to support application deployment and accessibility.
- Optimized website performance through improvements to loading times, database queries, and resource usage.
- Collaborated with an ICT mentor to deploy and troubleshoot the application in a Debian-based server environment.

Operating System Practicum Assistant, Telkom University **Sept 2025 - Jan 2026**

- Assisted students with operating system laboratory exercises and fundamental system concepts.
- Helped troubleshoot practical issues during laboratory sessions.

Object Oriented Programming Practicum Assistant, Telkom University **Sept 2025 - Jan 2026**

- Assisted students in understanding object-oriented programming concepts and completing practical programming exercises.
- Supported laboratory sessions and helped troubleshoot programming issues.

EDUCATION

Telkom University, Bandung **Aug 2022 - Aug 2026**

Bachelor's Degree in Informatics

- Academic interests: Web Development, Cybersecurity, and Data Analysis.
- Relevant coursework: Full-Stack Development, Computer Networks, Database Systems, and Machine Learning.
